WYNYARD GARDEN VILLAGE

The Wynyard area has recently been granted Garden Village Status with a vision to deliver an exclusive living space within a high-quality sustainable settlement, accommodating a mixture of executive housing, market housing and employment development, as well as providing access to education, community facilities and green infrastructure for residents. Garden towns and villages are not a new concept and date back to the 19th century as a proposed greener alternative to urban slums. Today, these schemes should be delivered with the same ethos of the past, but in a 21st century context to create vibrant and diverse communities and are designed to tackle the housing crisis by easing pressure on existing towns and cities. Locally led garden villages have enormous potential to deliver the homes that communities need. A masterplan for high quality homes and funding has already been approved and the Wynyard area will be transformed into one of the largest privately owned mixed-use developments in the country and hold the title of the largest new housing area in the north-east, with approximately 7,000 proposed homes over a 15 year period. The garden status will allow access to a six-million-pound government fund, with the additional benefit of government support in terms of expertise, brokerage, and new planning freedoms; new garden projects will also have access to infrastructure funding programmes across government.
